SURGICAL PATHOLOGY

January 7, 1930

My dear Professor Hortega:

You may remember my calling at your laboratory in April 1928. I have pleasant recollections of your kindness to me at that time and the trouble you took to show me your methods.

I am sending you a reprint of an adaptation of your technique to tumors, with results that have interested us here very much. Up in Montreal, my friends, Professors Penfield and Cone and also Professor Masson (formerly of Strasbourg) have been using this technique for the past year.

I wish to express my indebtedness to you for the silver technique as well as for the personal kindness shown me at your laboratory.

Yours sincerely,

Dr. George F. Laidlaw
