

THE JOHNS HOPKINS UNIVERSITY
BALTIMORE, MARYLAND

DEPARTMENT OF ZOOLOGY

March 23, 1932

Dear Professor del Rio-Hortega,

I have read with interest several of your papers concerning technical methods for the detection of mitochondrial and other cytoplasmic inclusions. Unfortunately I have only very limited access to the periodicals containing your work. I would be greatly indebted to you if you could send me some of your reprints containing the details of such techniques, especially those in the Bol. Madrid Soc. Españ. Hist. Nat. 1925.

If there is any expense entailed I shall be glad to remunerate you for it.

Respectfully yours,

William L. Doyle
