June 7-1934

Dr. P. del Rio-Hortega,
Madrid. Spain

Dear Dr. Rio-Hortega,-

I have now returned home after a very pleasant voyage of 9 days from Vigo to New York, on the S.S. "Magallanes". It was a great pleasure and privilege to study in your laboratories, and although the time was short, I feel that I have learned much.

I am sending you two books, which may be useful at the Institute. One of them is ~~to~~ with the compliments of Dr. Donaldson of the Wistar Institute. For many years he has made an intensive study of the rat, and was one of the first to have a colony of these animals. He keeps a complete bibliography of the rat, and many write to him for information, which he is glad to give. The other little book shows how the animals are cared for, at the Wistar Institute here.

I send my greetings to those at the laboratory,
and best wishes to yourself, for a pleasant trip to Russia.
Yours sincerely,
W. H. D. Addison.
